Combined Proceedings International Plant Propagators’ Society (ISSN 0538-9143) is a yearly publication of the International Plant Propagators’ Society (IPPS), 526 Brittany Dr., State College, Pennsylvania 16803, U.S.A. Phone: 1-814-238-3494; Fax: 814-238-7051; e-mail: Secretary@ipps.org

Business Office. Memberships are processed at the regional level, with dues being allocated to both international and regional expenses. Contact the regional secretary-treasurer (http://www.ipps.org) in your area of the world for membership information and applications. Correspondence regarding replacement copies of proceedings, claims, and changes of address should be sent to a regional secretary-treasurer.

The International Plant Propagators’ Society is not responsible for statements and opinions published in the Combined Proceedings International Plant Propagators’ Society; they represent the views of the authors or persons to whom they are credited and are not necessarily those of the Society. The publication of research or other types of information by the Society does not constitute a recommendation or endorsement of products or procedures involved; for general use, label recommendations and directions must be followed.

Reprinting and quotations from the Combined Proceedings International Plant Propagators’ Society are permitted only on the conditions that full credit is given to both the Combined Proceedings International Plant Propagators’ Society and written approval is obtained from the author(s). In addition, the volume, pagination, and date of publication must be indicated.

SUMMARY – 2005

This completed the 55th year of the founding of this Society in Cleveland, OH. It should be noted that David Dugan, who lives in Cleveland, is the only founding member still with us. The organization has grown, shrunk, formed new regions, changed, but with those 55 volumes of Combined Proceedings, we are being recognized as the world’s leading written source of practical plant propagation information. Our papers are being referenced by major referencing organizations, and the International Society of Horticultural Science, as noted below, is interested in becoming affiliated with us.

The bulk of the Society’s work is really carried out by the regions and their officers. The regions hold meetings with innovative topics that result in edited papers that fill our volumes. The secretary-treasurers handle their regional memberships and many meeting details. The International Board sets overall policies and assists with the publication of the “Black Book,” or now a CD, and provides information on membership services. Truly the willingness to seek and to share has helped the Society to become an organization of pride for all members, and this ability “to seek and to share” will serve us well into the future.

This year, our overall International membership dropped by 18. Our total membership has been declining for the last seven years, although this year it was a very small drop. There continues to be a larger proportion of the members who prefer the CD, which means the total book count for the volume is falling each year. As printing numbers decline it is increasingly a struggle to produce fewer Black Books at a low cost. The following chart indicates the 2005 membership and its breakdown for CD and Black Books.

The next chart details membership counts over the last seven years. During that time, the membership dropped 518 members, or a decline of 18½% from the 1999 membership. All regions are working at retaining members as well as on recruitment. This may be a reflection in the demographics of the plant propagation industry, which seems to be occurring world-wide.

Our investment advisor and broker decided to move to Providence, RI, where he has joined his family’s firm, Brown, Cummins/Lisle. He is making quarterly visits to his clients in Seattle and, in a year or two, hopes to start a west coast branch. The interaction continues the same through telephone calls and emails. This resulted in no interruption in our service.

As outlined by the previous International Board, the main scope of work on the web-based computerization program dealt with regional issues on labels and reports. It was noted that several regions were using the program to send mass emails to members regarding regional events.

The International Meeting was held in conjunction with the 46th Annual Meeting of the Western Region in the Embassy Suites, in San Luis Obispo on October 19, 2005. The Western Region Conference followed on October 20 – 22, 2005.

The International Meeting was preceded by a tour, planned and led by International President Mike Evans. It began on October 9, 2005, in the beautiful California fall-season in the Los Angeles area, moved south into Orange County and San Diego, backtracked around to Santa Barbara and its environs, and finished in San Luis Obispo, a beautiful and historic town on the central coast of California.

While staying in Pasadena, tour stops included Huntington Gardens and Monrovia Nursery. From there, we moved south into Orange County for stops at Rogers Gardens and Tree of Life Nursery. We were treated to true Southern hospitality, Hispanic food and music at the Tree of Life Nursery, where Mike Evans had invited many local people to mingle with us. The California breezes, the strumming of guitars, the smell of the barbeque, and colorful decorations were outstanding.

As we approached the San Diego area, we saw many specialty nurseries...poinsettias, bromeliads, cactus, tropics, perennials, tissue culture, plug production, as well as the world famous Balboa Park and San Diego Zoo. We were fortunate to have stayed in San Diego's historic gaslamp district.

From there, we headed north for a tour through the Getty Museum in Los Angeles with our evening destination in Oxnard, CA. We made day trips into Ventura and Santa Barbara to see nurseries specializing in plant genetics, general ornamentals, subtropical fruits, and Mediterranean plants. In addition we visited Santa Barbara Botanic Garden and Lotusland.
The weather was sunny and hot, but not for southern residents. We had plenty of exercise touring up and down those hillsides at nurseries and greenhouses. We did enjoy a rain storm while at the Santa Barbara Botanic Garden.

The final leg of our tour along the historic “El Camino Real” took us into a most beautiful part of California, where we stopped at the La Purisima Mission. Then it was on to San Luis Obispo for the Business Meeting and Conference. We owe a great deal of gratitude to President Evans, his staff, and all the people who helped to make this such a memorable tour.

The International Board Meeting was conducted by President Evans, and directors were present from all regions including the Southern African Potential Region. Alternate directors were present from all regions except New Zealand and Scandinavia. Peter Bingham served as meeting parliamentarian.

Secretary-Treasurer John Wott and Editor Charles Heuser presented their annual reports, which were accepted. The Board reviewed inventory numbers, print numbers, and membership sales.

The Board approved the formation of “The International Promotion Committee,” which is to study and then recommend to the 2006 International Board ways for regions to recruit new members. This would be paid by accumulated reserve funds.

The Society has received an inquiry from the International Society of Horticultural Science (ISHS) in which they would like to be able to place all of our volumes on a web site and make them available, at some cost, to their members as well as ours. They feel that our volumes are scientifically worthy to be indexed and used by the international horticulture community. Dr. Heuser was asked to chair a committee to study the proposal and bring back a proposal at the next International Board meeting.

The Regions of New Zealand and Australia, and Southern African Potential Region asked if their papers could be posted on the web early since it can be up to 19 months from the time they hold a meeting until the papers are actually published. The papers will be password protected and then removed when the volume is actually published.

Director du Toit reported on progress in IPPS in South Africa with definite goals established. Included are: (A) focus on practical training, (B) motivate nursery owners to sponsor employee membership, (C) link to South Africa Government Skills Development Plan. Director Dunn outlined the program in Continental Europe and reported on the Bulgarian Journal now being published.

Vice-president Selchau outlined the 2006 International Board Meeting and Tour, which will take place in Sweden, Norway, and Denmark. Vice-president elect Gilbert and Director Tilt reviewed preliminary plans for the 2007 International Board Meeting to be held in Chattanooga, TN.

A major item of business was the resignation of Secretary-Treasurer Wott, who will have held the International position for 20 years at the end of 2006. A special committee of the Board conducted a search, held meetings, and then brought forth the nomination of the firm of Calabrese & Heuser for assuming this position starting in January 2006. It was unanimously approved. During 2006, this firm will work with Dr. Wott on the transition.
Since this is a major change, it will require some Constitutional changes, which will be brought forth at the next meeting. Also the current voting privileges of the Secretary-Treasurer and Editor as currently specified in the Constitution will be eliminated under the new appointments.

A Finance Committee was appointed to be responsible for monitoring the financial affairs and authorizing financial activities. The committee will conduct extension review during 2006, including the investment policies, and return to the 2006 with specific recommendations.

The joint application of the Great Britain & Ireland and Scandinavia Regions for two promotional workshops, in the Netherlands and in Germany was approved for $10,000. The Regional Directors presented brief updates on IPPS issues within their regions. This is an excellent dialogue for exchange of ideas.

Various items concerning the 2006 budget were discussed. The budget was passed with a proposed deficit of $17,440.00. This includes income of $155,200.00 and expenses of $172,640.00. This is largely due to the transition expenses related to the office of Secretary-Treasurer.

I would like to thank Mike Evans for his leadership as International President and Jörgen Selchau for being an involved vice-president. Also, it has been a pleasure to work with all the Directors and Alternate Directors this year. As usual, the Regional Secretaries and Regional Treasurers carried on with their tasks in great style and success.

I would also like to profusely thank my fellow officer, Dr. Charles Heuser, for his support, guidance, and good humor. The Society owes much gratitude to Warren Roberts for his service as botanical editor. On a daily basis, I would like to mention Carrie Cone, Rebecca Johnson, and Fran Myer from the University of Washington Botanical Gardens. Also thanks to Scott Lisle for his financial advice and to Johan Pingree, web master.

Lastly, I would like to thank all those, from all over the world, whose friendship, goodwill, and patience I have enjoyed. This has been a most marvelous position in a Society that can only get better in the future.

Starting on January 1, 2006, this position was assumed by the firm of Calabrese & Heuser, 526 Brittany Drive, State College, PA 16803, USA. The principal contact will be Mrs. Patricia Heuser.

Prepared: April 15, 2006

IN MEMORIAM

It is with the deepest regret that the deaths of the following members that were reported during 2005 are recorded:

Howard C. Brown  Western Region
Rob Burrows    New Zealand Region
John Follett   New Zealand Region

RECIPIENTS OF EASTERN REGION'S PLANT PROPAGATORS' AWARD OF MERIT

This award is made to the individual(s) who, in the opinion of the Award of Merit Committee, has made a significant contribution to the field of plant propagation. The criteria for selection include scientific discovery and application of facts related to propagation practices and techniques, and/or for service rendered to the science and practice of plant propagation.

The following have received the award:

L.C. Chadwick*, Columbus, Ohio, 1957
F.L. Skinner*, Morden, Manitoba, 1958
J.S. Wells*, Red Bank, New Jersey, 1959
H.M. Templeton, Jr.*, Winchester, Tennessee, 1960
Carl Kern, Cincinnati, Ohio, 1962
Charles E. Hess, Lafayette, Indiana, 1963
WE. Snyder*, New Brunswick, New Jersey, 1964

Martin Van Hof*, Newport, Rhode Island, 1966
Leslie Hancock*, Cooksville, Ontario, 1968
F.L.S. O'Rourke, Fort Collins, Colorado, 1969
Case Hoogendoorn*, Newport, Rhode Island, 1970
Alfred Fordham*, Jamaica Plain, Massachusetts, 1971
Richard H. Fillmore*, Duke University, 1972
William Flemer III, Princeton, New Jersey, 1973
Harvey Gray*, Melville, New York, 1974
Hugh Steavenson*, Elsberry, Missouri, 1975
Thomas Pinney, Jr., Sturgeon Bay, Wisconsin, 1976
John Roller*, Marshall, Texas, 1977
Ray Halward*, Hamilton, Ontario, 1978
Carl Orndorff*, Clarksville, Maryland, 1980
Ralph Shugert*, Grand Haven, Michigan, 1981
J. Peter Vermuelen, Neshanic Station, New Jersey, 1981
John McGuire, University of Rhode Island, 1982
Larry Carville, Vernon, Connecticut, 1982
Richard H. Zimmerman, Beltsville, Maryland, 1984
Joerg Leiss, Oakville, Ontario, 1985
James Cross*, Cutchogue, New York, 1986

Edmund V. Mezitt*, Hopkinton, Massachusetts, 1987
Leonard Savella*, Exeter, Rhode Island, 1988
Elton M. Smith, Columbus, Ohio, 1989
Wayne Lovelace, Elsberry, Missouri, 1990
David H. Dugan, Rocky River, Ohio, 1991
Peter Orum, St. Charles, Illinois, 1992
Charles Tosovsky, Edwardsville, Illinois, 1993
Charles W. Heuser, Jr., State College, Pennsylvania, 1994
Elwin R. Orton, Jr., New Brunswick, New Jersey, 1995
Chris Graham, Hamilton, Ontario, 1996
Robert Gouveia, Norton, Massachusetts, 1997
David Bakker, Sr., St. Catharines, Ontario, 1998
Harold Pellett, Chanhassen, Minnesota, 1999
Richard (Dick) Bir, Fletcher, North Carolina, 2000
Kris R. Bachtell, Lisle, Illinois, 2001
Deborah McCown, Madison, Wisconsin, 2002
Kathy Freeland, St. Charles, Illinois, 2003
Jack Alexander, Jamaica Plain, Massachusetts, 2004
H. William (“Bill”) Barnes, Warrington, Pennsylvania, 2005
*Deceased

FELLOW RECIPIENTS
David R. Dugan, 1990
Kathleen S. Freeland, 1990

### WESTERN REGION

**OFFICERS**

*President* — **DAVID HANNINGS**, Horticulture and Crop Sciences, California Polytechnic State University, San Luis Obispo, California 93407

*First Vice-President* — **DOUGLAS E. C. JUSTICE**, UBC Botanical Garden, 6804 SW Marine Drive, Vancouver, BC V6T 1Z4, Canada

*Second Vice-President* — **GUY MEACHAM**, J. Frank Schmidt & Son, 9500 SE 327th, Boring, Oregon 97009
Executive Committee

David Hannings, President
Douglas E.C. Justice, First Vice-President
Guy Meacham, Second Vice-President
Michael Nevin Smith, Third Vice-President
Kathleen M. Echols, Past President
James F. McConnell, Director on International Board
Kathleen Echols, Alternate Director on International Board

Jill Cross, Director (term expires 2005)
Shengjun Lu, Director (term expires 2005)
Michael A. Anderson, Director (term expires 2006)
Michael Bone, Director (term expires 2006)
James M. Conner, Director (term expires 2006)

LIST OF PAPERS PRESENTED AT ANNUAL MEETINGS

SEVENTH ANNUAL MEETING — SOUTHERN AFRICAN POTENTIAL REGION

Environmentally Sustainable Production Systems for Producing Ornamental Plants
John Bunker ........................................................................................................... 41

Protection of Plant Novelties — An Update
Jörgen H. Selchau .................................................................................................. 48

Water Recycling: How We Do It
Eebbie Deckys ........................................................................................................ 53

Grafting of Waxflowers for Root Rot Management
Ian Gordon .............................................................................................................. 56

Phormiums: Production in 2005
Robert Bett ............................................................................................................. 59

Growing Australian and South African Native Plants in Soilless Media
Kevin Handreck ..................................................................................................... 64

Breeding and Selection of Brachychiton
Des Boorman ........................................................................................................ 68

New Plants From New Zealand
Malcolm Woolmore .............................................................................................. 71

An Insight into an Accredited Potting Mix Supplier in Australia
Shaun Windrim ....................................................................................................... 73

Sharing Simple, Inexpensive Ideas From Nursery Producers
Ken Tilt and Jeff Sibley ......................................................................................... 75

Specialisation — Advantages and Disadvantages Compared
Peter Bingham ...................................................................................................... 79

THIRTY-THIRDD ANNUAL MEETING — AUSTRALIAN REGION

Adaptation — The Secret of Survival of the Biota Through Geological Time
Mary E. White ....................................................................................................... 85

Making Us “Future-Proof” — The Evolving Role of Horticulture
Elizabeth G. Heij ................................................................................................. 88

Horticultural Education as a Life-Changing Experience
Bronwen M. Rowse ............................................................................................. 93

The Role of Clonal Propagation in Forestry and Agriculture in Australia
Peter Radke .......................................................................................................... 96

Propagation of a South African Arid Zone Plant — Lithops
Jac Duif .................................................................................................................. 100

Propagation Strategies to Support a Wide Hybridization Breeding Program Within the Chamelaucium Alliance
Chris Newell, Digby Growns, and Chris McMullan ........................................... 102

Shoot Dieback of Geraldton Wax
Naomi Diplock and Vic Galea ............................................................................... 105
List of Papers Presented at Annual Meetings

Propagation of *Bougainvillea*
Brian Smith ................................................................. 110

Grafting Australian Native Plants: 30 Years of Progress
David Beardsell ............................................................ 112

Grafting Tissue Cultures Directly onto Nursery Grown Stock
Jonathan Lidbetter and Pauline Cain ............................ 114

“Long John” Grafts
Allen Gilbert ................................................................. 117

Breeding with Indigenous *Citrus* Species
S.R. Sykes ........................................................................ 120

*Auscitrus* — The Australian Citrus Budwood Scheme
Tim Herrmann ............................................................... 124

Some Problems in Water Recycling
Stan Leach ....................................................................... 128

Water Saving, More Than Just Recycling
Garry Heyne ................................................................... 131

Evaluating an Irrigation System Upgrade
John Messina .................................................................. 136

Water Disinfecting Techniques for Plant Pathogen Control
William Yiasoumi ............................................................ 138

Growing Plants in Hot Climates
Robert Chin ....................................................................... 142

THIRTY-FOURTH ANNUAL MEETING — NEW ZEALAND REGION

A Weed or a Rose? The New Zealand Hazardous Substances and New Organisms Act
Libby Harrison and Geoff Ridley ....................................... 151

Regulatory Barriers to Introducing New Plants Need to Be Minimized to Grow the New Zealand Economy
Jim Douglas .................................................................... 155

Unforeseen Consequences
Keith Hammet ............................................................... 160

How to Create a Strong Brand
Charlotte Henley ........................................................... 163

The Effect of Gibberellic Acid, Potassium Nitrate, and Cold Stratification on the Germination of Goldenseal (*Hydrastis canadensis*) Seed

Using Tissue Culture to Help Develop New Crops
P.J. Fletcher, J.D. Fletcher, and J.M. Follett ........................ 171

Showcasing New Zealand Native Plants at Chelsea Flower Show
Trish Waugh ................................................................. 174

Making the Most Out of What You Grow — A Client’s Perspective
Roger Milne ................................................................... 181

Replanting for the Future: Environmental Restoration and a Look at What Is Happening in Tauranga City
Mark Dean ........................................................................ 182
Superior Callas: More Than Just Great Flowers
John F. Seelye, Garry K. Burge, Andrew C. Mullan, and Margaret E. Young ................................................................. 190

You Have a New Variety?
Chris Barnaby ........................................................................................................................................................................... 194

Pests Can Be Unintentionally Spread in New Zealand Through Commercial Transport of Nursery Plants
Mark McNeill, John Proffitt, Craig Phillips, and Nigel Bell ...................................................................................................... 198

Time to Rethink Some Aspects of Agriculture
Duncan Burns ............................................................................................................................................................................ 203

Sprinkler Uniformity in Greenhouses and Nurseries
Peter Savory ................................................................................................................................................................................ 206

TWELFTH ANNUAL MEETING — IPPS JAPAN REGION
The New Start of IPPS-Japan Region
Kaneto Aoyama ........................................................................................................................................................................ 211

Production of Disease-Resistant Tissue Culture Seedlings Using Endophytic Actinomycetes
Hitoshi Kunoh, Tomio Nishimura, Sachiko Hasegawa, Akane Meguro, and Tadao Fujimori ..................................................... 212

Disease Resistance and Drought Tolerance of Kalmia latifolia Induced by Endophytic Actinomycetes
Tomio Nishimura, Sachiko Hasegawa, Akane Meguro, Hitoshi Kunoh, and Tadao Fujimori .................................................... 213

Current State of the Fruit-Tree Liner Nursery Industry in Japan. Report No. 1
Naoki Omori ............................................................................................................................................................................... 214

Genetic Resources of Indigenous Citrus Species at Kinki University
Nobumasa Nito ............................................................................................................................................................................. 215

MIYOBI: A New Fertilizer Containing Abscisic Acid
Yasuo Kamuro ............................................................................................................................................................................ 216

Rapid In Vitro Production of Plants From Immature Seeds in Lilium japonicum
Hidehiro Inagaki, Hisao Otsuka, and Yoshinori Terada ........................................................................................................... 219

The Effect of Slits of Circle Slit Cancel Pot (CS POT)
Mikio Minamide .......................................................................................................................................................................... 222

Hokkaido Travels for Post Tour in 2004 IPPS's International Meeting
Masaru Shibata ............................................................................................................................................................................. 229

A Plant-Growing Apparatus for Producing CO$_2$-Dissolved Water
Akihisa Minato and Takayuki Asada ........................................................................................................................................ 231

On the Utilization and Propagation of the Variations Induced by Grafting and Synthetic Artificial Chimera
Yutaka Hirata, Yuzu Ohta, Gen Hattori, Koji Okayasu and Yoshi Ohashi .................................................................................. 233
THIRTY-EIGHTH ANNUAL MEETING—REGION OF GREAT BRITAIN AND IRELAND

The Role of Training and Education within the U.K. Nursery Stock Industry
Leigh Morris ................................................................. 237

Preparing for a New Propagation Unit
Peter van Delft ............................................................. 243

Advantages of In-House Propagation at Bransford Webbs Nursery
Karl O’Neill ................................................................. 247

Developments in the Supply Chain of Hardy Ornamental Nursery Stock for the Retail Market: A Finished Plant Grower’s Perspective
Alastair Hazell ............................................................. 250

The Role of Propagation in a Small Specialist Nursery
Irene Bowron ............................................................. 253

The Development of Sustainable Growing Media Components from Composted Specific Bio-Waste Streams
N. Bragg, T.F. Brocklehurst, A.C. Smith, M. Bhat, and K.W. Waldron ....... 256

Suzanne O’Neill ............................................................. 259

Integrated Pest Management for Ornamental Protected Plants
Neil Helyer .......................................................................... 262

Experiences in Propagation of Cornus mas and Cornus florida Cultivars
Norman Standbrook .......................................................... 268

Experiences in Propagation and Production of Grasses and Grass-Like Plants
Claire Wilson ......................................................................... 270

Propagation of Cercis canadensis ‘Forest Pansy’
Nicholas J. Murphy .......................................................... 273

Micropropagation of Mother Stock Plants at Walberton Nursery
Claire K. Hobbs ..................................................................... 277

Use of Cost Analysis to Improve Nursery Profitability
Will George ............................................................................. 281

Experience of Applying Lean Manufacturing on a Container Nursery
Gill Dowling ........................................................................... 288

Propagation and Cultivation of Arctostaphylos in Relation to the Environment in its Natural Habitat in California, U.S.A.
Lucy Hart ............................................................................... 291

One Nurseryman’s Perspective on the Changing U.K. Nursery Trade
Peter Catt ............................................................................... 295
FOURTEENTH ANNUAL MEETING — IPPS SCANDINAVIAN REGION
Modern Ways of In Vitro Propagation
Anne Kathrine Hvoslé-Eide .............................................................. 299

Somatic Embryogenesis in Schlumbergera truncata
Ezz Al-Dein Al-Ramamneh, Sridevy Sriskandarajah, and Margrethe Serek .......................................................... 308

Campanula (Campanulaceae) in Nature and in Pots
Gert Jensen, Rune Harboe Nielsen, and Arne Skytt Andersen .......... 310

FIFTY-FIFTH ANNUAL MEETING — EASTERN REGION, NORTH AMERICA
President’s Welcoming Remarks
Tom Intven ...................................................................................... 321

Exciting Developments in the World of Cornus
Elwin R. Orton and Thomas J. Molnar ............................................ 322

Developments in Production and Use of Trees, Shrubs, and Perennials
Gert Fortgens .................................................................................... 325

Some Common Misconceptions About Seed Dormancy
Robert L. Geneve ............................................................................. 327

Chanticleer—A Plant-Geek Pleasure Garden
R. William Thomas .......................................................................... 331

Rooting Cuttings Hydroponically in Compost Tea and Wastewater

Plant Propagation — Industry and Development
Romel Flores .................................................................................... 338

From Propagation to Finish: Container Production at Princeton Nurseries
Baldomero Aparicio .......................................................................... 340

Propagating Asclepias tuberosa from Seed: The Process
Francisco Castillo ............................................................................. 343

Nutrition and Management of Perennial Stock Plants
Sinclair A. Adam, Jr. ......................................................................... 348

Germination of Rudbeckia fulgida var. sullivantii ‘Goldsturm’
Allen R. Pyle .................................................................................... 355

Propagation of Sarracenia Species
Randolph A. Heffner ....................................................................... 356

Asters in the Mid-Atlantic Region: Performance Evaluation and Recommendations for Landscape Use
Jeanne Frett and Vic Piatt .................................................................. 361

Utilization of Global Assets for the Production of Nursery Products
David B. Kirwan ............................................................................... 368

Epimedium: Back to Basics
Anthony Eversmier ......................................................................... 371

Update on Micropropagation of Trillium Taxa
S.L. Kitto, David Opalka, and Jesse Sinanan .................................... 374
Judge Them by Their Appearance: Trialing Landscape Shrubs at Longwood Gardens
Debbie Metrustry .......................................................... 375

Conifer Propagation
George Smith ........................................................................ 378

Understock — Keys to Success
Brad Thompson ...................................................................... 380

Cutting Propagation of Large Leaf Rhododendrons and Deciduous Azaleas
Henry “Hank” Schannen ....................................................... 382

Chip Budding Hard-to-Root Magnolias
Richard Hesselein .............................................................. 384

Correlation of Growing Degree Days and the Timing of Cuttings
H. William Barnes .................................................................. 386

Propagating Wild-Collected Seed of Woody Species
Shelley Dillard ........................................................................... 393

Plant Exploration: Gamble for the Big Payoffs
James Harbage ......................................................................... 395

Cutting Edge Perennials: No Bandages Provided!!!
Stephanie Cohen ....................................................................... 398

Plants and Substrates Are the Heart of the Green Roof
David J. Beattie, Robert D. Berghage, and Edmund Snodgrass ........ 400

New Introductions from Europe
Gert Fortgens ........................................................................... 405

New Plant Forum
Jack Alexander, Andrea Bonville, Allen Bush, Jeremy Deppe,
Chuck Flinn, Harlan Hamernik, Alan Jones, Susanne Lucas,
Chad Osborn, Peter Podaras, Adam Wheeler ................................ 407

POSTER SESSION
Softwood Cutting Propagation of Native Lauraceae
(Lindera benzoin and Sassafras albidum) as Alternatives
to Invasive Horticulture Plants
Jenna Sicuranza, Nick Castrataro, Bill Johnson, and Brian Maynard ........ 415

Propagation of Woody Plants Through “Long” Cuttings
Jelle Hiemstra and Bart van der Sluis ........................................ 417

The Development of Verticillium-Resistant Acer Rootstocks
Jelle Hiemstra and Bart van der Sluis ........................................ 421

Cultivar Trials at Applied Plant Research
Margareth Hop ........................................................................ 423

Use of Paper-Mill Sludges and Municipal Compost in Nursery Substrates
Calvin Chong and Peter Purvis ................................................ 428

Interspecific Hybridization of a White-Flowered,
Cold-Hardy Alstroemeria
Elizabeth Kollman and Dr. Mark Bridgen .................................. 433

The Effects of Nitrogen Level and Mist Frequency on
Rooting of Three Phlox Species
Sinclair A. Adam Jr. ................................................................. 434
Severe Cutback of Stock Plant Influences Rooting in Shoots of *Quercus bicolor* and *Quercus macrocarpa*
Naalamle Amissah and Nina Bassuk .................................................. 436

A Comprehensive *Echinacea* Germplasm Collection  
Located at the North Central Regional Plant Introduction Station, Ames, Iowa  
Joe-Ann H. McCoy, Mark P. Widrlechner, and Jeffrey D. Carstens .......... 439

The Grafting of *Cedrus libani* ‘Pendula’ onto *Picea abies*
H. William Barnes ............................................................................. 441

A Taxonomic Revision of *Chamaecyparis nootkatensis*  
*£. pendula* and Implications for Rootstock Selection for Grafting  
H. William Barnes ............................................................................. 443

Grafting of *Prunus davidiana*: Possibilities for Production  
H. William Barnes ............................................................................. 446

Propagation of *Osmanthus armatus* From Hardwood Cuttings  
H. William Barnes ............................................................................. 448

*Mespilus canescens* a Newly Discovered Species  
Propagation by Grafting onto *Crataegus*  
H. William Barnes ............................................................................. 449

Somatic Embryo Development in Willow Oak  
S. Wells, S.T. Kester, and R.L. Geneve ............................................... 451

Breeding Rebloom Diploid Daylilies in Colors Other Than Yellow and Gold
Darrel Apps .......................................................................................... 454

FORTY-SIXTH ANNUAL MEETING — WESTERN REGION
What You Need to Know About Viruses  
Michael A. Yoshimura ........................................................................ 459

New Propagation Facilities at Monrovia Nursery,  
Visalia, California  
Jeremy Bahne ...................................................................................... 462

General Session I: Question and Answer Session .............................. 464
The Best Treatment Combination for Air Layering Litchis  
Michelle Kong ...................................................................................... 466

Propagation of *Arbutus* ‘Marina’ by Air-Layering  
Celeste Whitlow and David Hannings .................................................. 469

Improving Handling and Rooting of *Thunbergia alata*  
Joseph Coelho, David Hannings, J. Wyatt Brown, and Matt Ritter ........ 472

General Session II: Question and Answer Session .............................. 477
Disease and Pest Avoidance and Control in Cutting Production  
Gail Shafer ......................................................................................... 479

Trials with Natural Growth Promoting Products  
John Keller ........................................................................................... 481

Selection of Mycorrhizal Fungi for California Native Plants  
Lea Corkidi, Mike Evans and Jeff Bohn ................................................ 489

General Session III: Question and Answer Session ............................ 490
Best Management Practices at Monrovia Growers to Prevent the Introduction and Spread of *Phytophthora ramorum*
John Keller ................................................................. 491

Bryophytes and Soil Acidification Effects on Trees: The Case of Sudden Oak Death
Lee F. Klinger ............................................................... 493

Selecting the Right Herbicide for Nursery and Landscape Use
Robert P. Rice Jr. .......................................................... 504

General Session IV: Question and Answer Session ....................................................... 506

Notes on Propagation of Various Tropical Woody Ornamentals
Richard A. Criley .......................................................... 507

The Micropropagation and Reintroduction into an Open Environment of Sterile *Plumeria rubra* Adult and Seedling Tissue
William S. Miller and Richard A. Criley ............................................................. 512

The Propagation of Uluhe Fern (*Dicranopteris linearis*): Vegetative Versus Spores
Ethan A. Romanchak, Richard A. Criley, and Nellie Sugii ........................................... 517

Propagating Native Plants for the Hopi Nation
Thomas D. Landis, David R. Dreesen, Jeremy R. Pinto, and R. Kasten Dumroese ...... 520

General Session V: Question and Answer Session .................................................... 523

Evaluation of Seedling Quality and Planting Tools for Successful Establishment of Tropical Hardwoods
J.G. Mexal, P. Negreros-Castillo, R.A. Cuevas Rangel, and R. Moreno .................... 524

General Session VI: Question and Answer Session .................................................... 531

THIRTIETH ANNUAL MEETING — SOUTHERN REGION OF NORTH AMERICA

Technical Sessions
Bill Turk, Alan Shapiro, and Bob Smart ................................................................. 535

New Plants for the South
Ted Stephens ................................................................. 536

Growing Quality Trees for Southeastern Landscapes
Michael Marshall ............................................................ 542

Grafting Deciduous Plants: Before and Aftercare
Brian L. Upchurch .......................................................... 546

Impact of Nitrogen Concentration on Stock Plant Yield and Cutting Performance of ‘Purple Small Leaf’ and ‘Raspberry Ice’ Bougainvillaeas
Christopher B. Cerveny, James L. Gibson, and James E. Barrett ......................... 550

Evaluation of Quincloracine and Diuron for Postemergence Control of Liverwort
Adam F. Newby, Charles H. Gilliam, Glenn R. Wehtje, and James E. Altland .......... 556

Pinebark Mini-Nuggets Provide Effective Weed Control in Nursery Crops Grown in Large Containers
Ben M. Richardson, Charles H. Gilliam, Glenn R. Wehtje, and Glenn B. Fain .......... 561
A Propagator’s Notebook
  Charlotte LeBlanc ................................................................. 566

Tropical Heat: New Coleus Introductions From the
  University of Florida
  Penny Nguyen and David Clark ............................................. 571

The China Connection — People, Plants, and Plans of a
  Horticultural Giant
  David L. Creech ....................................................................... 575

Methods and Techniques to Improve Root Initiation of Cuttings
  Mark Crawford .......................................................................... 581

Optimizing the Water Relations of Cuttings During Propagation
  Fred T. Davies, Jr ...................................................................... 585

Educating the Next Generation of Propagators
  Ozzie Coor ............................................................................... 593

Propagation Decisions in a Fluid Market
  Jim Berry .................................................................................. 595

Propagation of New Introductions
  Mark Griffith ............................................................................ 598

A Water Quality Issue: Opportunity or Opponent?
  Tom Yeager and Ken Kuhl ..................................................... 601

Bouncing Back: Lessons Learned from Hurricanes
  Tacy Callies .............................................................................. 604
TECHNICAL SESSIONS

SOUTHERN AFRICIAN POTENTIAL REGION

Seventh Annual Meeting

March 2–4, 2005
PRETORIA, SOUTH AFRICA
TECHNICAL SESSIONS

AUSTRALIAN REGION

Thirty-Third Annual Meeting

April 22–24, 2005
MILDURA, VICTORIA, AUSTRALIA
TECHNICAL SESSIONS

NEW ZEALAND REGION

Thirty-Fourth Annual Meeting

May 12–15, 2005
TAURANGA, NEW ZEALAND
TECHNICAL SESSIONS

IPPS JAPAN REGION

Twelfth Annual Meeting

June 10–11, 2005
TSU, MIE, JAPAN
REGION OF GREAT BRITAIN AND IRELAND

Thirty-Eighth Annual Meeting

August 30–September 2, 2005
WINCHESTER, HAMPSHIRE, U.K.
TECHNICAL SESSIONS

EASTERN REGION, NORTH AMERICA

Fifty-Fifth Annual Meeting

October 3–6, 2005
ATLANTIC CITY, NEW JERSEY
TECHNICAL SESSIONS

WESTERN REGION

Forty-Sixth Annual Meeting

October 20–22, 2005
SAN LUIS OBISPO, CALIFORNIA
TECHNICAL SESSION

SOUTHERN REGION OF NORTH AMERICA

Thirtieth Annual Meeting

October 23–26, 2005
GAINESVILLE, FLORIDA
