Combined Proceedings International Plant Propagators’ Society (ISSN 0538-9143) is a yearly publication of the International Plant Propagators’ Society (IPPS) headquartered in Pennsylvania, U.S.A. Email: Secretary@ipps.org Website: www.ipps.org

Business Office. Memberships are processed at the regional level, with dues being allocated to both international and regional expenses. Contact the regional secretary-treasurer (http://www.ipps.org) in your area of the world for membership information and applications. Correspondence regarding replacement copies of proceedings, claims, and changes of address should be sent to a regional secretary-treasurer.

The International Plant Propagators’ Society is not responsible for statements and opinions published in the Combined Proceedings International Plant Propagators’ Society; they represent the views of the authors or persons to whom they are credited and are not necessarily those of the Society. The publication of research or other types of information by the Society does not constitute a recommendation or endorsement of products or procedures involved; for general use, label recommendations and directions must be followed.

Reprinting and quotations from the Combined Proceedings International Plant Propagators’ Society are permitted only on the conditions that full credit is given to both the Combined Proceedings International Plant Propagators’ Society and written approval is obtained from the author(s). In addition, the volume, pagination, and date of publication must be indicated.

DEDICATION

Jörgen H. Selchau, a member of the Scandinavian Region from Odense, Denmark, received the International Plant Propagators’ Society (I.P.P.S.) Award of Honour for 2006 from the International Board of Directors. This volume of the Combined Proceedings of I.P.P.S. is dedicated to him as part of the Award, which recognizes individuals who have given exceptional and distinguished service to I.P.P.S. and achieved outstanding accomplishments in the field of plant propagation.

Jörgen was born in Odense, Denmark, 60 years ago. His background and training were not in horticulture, but in international trade, administration, and shipping insurance.

Jörgen has been director of the licensing and patent advocate firm, GPL International, As in Odense, Denmark, since its establishment in 1981. The firm specializes in helping growers and breeders of horticultural plants obtain and manage their patents and licences on plant introductions.

Jörgen has been a member of the Scandinavian Region since its establishment and played an active role in its development and growth over the years. He served in all possible offices at the regional board level and also on the International Board of the International Plant Propagators’ Society. Additionally, he has been active in preparing two I.P.P.S. International Board Meetings and associated tours to the Scandinavian Region. Those two international tours in 1998 and 2006 were memorable visits to Sweden, Norway, and Denmark. Tour participants were shown state-of-the-art plant production and propagation nurseries in addition to cultural and historic sites. Tour stops during the 2006 tour featured several nurseries with robotic cutting propagation systems.

Jörgen served as the Scandinavian Regional President for six terms although not all in successive years. He has done this to the best of his ability with enthusiasm and love for the Scandinavian Region. At the International Board level, Jörgen served as an International Director for many years and was a valuable contributor to the International Board. He served in all offices, including two terms as International President during 1998 and 2006. He was a strong supporter of the Southern African Potential Region, which just received full regional status for 2007. He has participated in numerous Southern African Potential regional meetings over the years and presented papers at their conferences.

Jörgen has contributed numerous papers at regional I.P.P.S. meetings on the very complicated subject of international patent laws and regulations. He has been extremely active and has had a very significant role in international plant breeding organizations, served as secretary of the Danish Association of Plant Breeders, and has given lectures and published papers in their proceedings. In addition, he has been the Danish representative in the Breeders’ Committee of the International Seed Federation.

Even after such an active role in I.P.P.S. over the years, he still has the same enthusiasm and excitement for our Society, which is why he is held in high esteem among all the members of the Scandinavian membership and the industry at large.

Arne Skytt Andersen
International Director, Scandinavian Region
The International Plant Propagators’ Society, Inc.

*Deceased
The year 2006 was a year of evolution for IPPS in many areas. After twenty years of service as International Secretary-Treasurer, Dr. John Wott retired from that position. He provided continuity, history, and unwavering dedication to the organization over those twenty years, and his service was recognized during the International Tour in the Scandinavian Region in September. With many IPPS friends on that tour, he was honored at an informal dinner with a special award of appreciation and stories about his adventures as part of the International Board of Directors. During the year, John continued to provide assistance in the transition of the management function, transferring files, inventory of past issues of books and CDs of the Proceedings, and other IPPS materials to the new office in Pennsylvania.

The new International Secretary-Treasurer officially began the transition in January of 2006. Patricia E. Heuser heads a team of professionals who now provide contracted management services to IPPS through her company. Pat is known to many among IPPS as the wife of International Editor, Dr. Charles Heuser, but few are aware that she has been involved with horticulture and agriculture as an organizational manager of state, national and international trade groups for more than twenty-five years. Having traveled with Charles for International Board meetings over the years, her familiarity with IPPS made it easy to assume responsibility for the variety of management functions the group requires.

On another level, the International Board granted full regional status to the Southern African Potential Region, effective January 1, 2007. Unfortunately, the Society lost a region – the Scandinavian Region – which voted in September, 2006 to merge with the Region of Great Britain and Ireland as an area of that region.

MEMBERSHIP
The following reflects membership in IPPS for 2006, based on numbers reported by the Regional Secretary-Treasurers midway through the year:

COMMUNICATIONS
As part of the transition, the IPPS website was moved and updated. A new database of members was created for each region to maintain, with updated listings on the website every three months. The “Members Only” area of the website includes those regional listings of members as well as a “Message Board” for members to post inquiries and responses.
Regional Secretary-Treasurers rose to the challenge of assisting in the transition of the website database to new Access database files they would control. Over the first half of 2006, working with the new database manager and consultant provided through The Heuser Group, they learned how to use the new database to maintain records and transfer data to the central database housed in Pennsylvania, USA. They will continue to utilize new features of the database for their regional management over the next few years. Their contributions to the Society, its regional leadership, and its members continue to form the backbone of the organization’s structure and strength.

Dr. Charles W. Heuser, Jr., International Editor, mounted three of the four segments of the 50-year index of Proceedings – the subject index, the author index, and the contents index – on the IPPS website. The plant index for these volumes is progressing toward mounting on the website in 2007. Dr. Heuser’s continued dedication, remarkable knowledge, and persistence in pursuing a high standard of excellence in the publication of the Society’s wealth of shared knowledge remain a vital part of the IPPS prestige in today’s horticultural world.

INTERNATIONAL BOARD ACTIVITIES

In preparation for the International Board of Directors’ meeting in September of 2006, the international office prepared a CD of governance documents for each Officer, Director and Alternate Director, including policies and procedures and information that remains static from year to year. The CD, sent in advance of the International Board Meeting, allowed review before the meeting, and condensed the materials needed to support the meeting itself. For 2007, these reference materials will be available on the website for review and downloading at any time of the year.

Highlights of the International Board of Directors’ meeting, presided over by International President Jörgen H. Selchau of the Scandinavian Region, included the following:

- Financial reports and investments performance were reviewed, and the overall excellent financial health of IPPS was confirmed.
- Directors were reminded to encourage their members to be sure to report any changes in their personal contact information to their Regional Secretary-Treasurers so that the website listing of members can be kept up to date. Also encouraged is reporting email addresses so Regional offices can communicate via broadcast emails.
- The use of the Directors Reference Materials CD was discussed, and the International Office will also mount these organizational documents on the IPPS website in the members’ area for access by leadership and members as desired.
- Discussion was held on ways to make use of the inventory of past Proceedings on CDs and in books, and suggestions will be passed along to Regional offices.
- A Task Force was created to review the Society’s operating procedures for the International Office with the change in management systems from one individual to a contracted management firm.
- The group agreed to conduct an orientation session on the next and subsequent tours for directors and alternate directors who are attending the tour and meeting for the first time, to provide them with more information about how the International Board operates.
A decision was made to reimburse the International Office’s management company for funds spent to complete the new database system, beyond the funds previously budgeted for that purpose this year.

Membership reports were reviewed, noting that overall membership has dropped by 400 members in the past five years — current membership worldwide is 2,233.

A report on those receiving five-year membership plaques was reviewed, with 95 plaques sent to members in various regions for 2006.

The report on orders for the production of Volume 55 of the Combined Proceedings was reviewed, with 1,650 books and 700 CDs ordered. Also reviewed were plans to use an international mailing service to provide time-efficient and cost-effective mailing of books and CDs to countries outside the United States. Two-week delivery time is expected.

With some regions selecting their samples of papers to be posted on the website for this year, we now have three years of sample Proceedings papers on the website.

The 50-year index of the Combined Proceedings is posted on the website with the paper titles, authors, and subject indices completed — the plant index is still being prepared.

Regional Editors in New Zealand, Australia, and Southern Africa were encouraged to post the .pdf files of their papers on their own regional websites.

Production costs for Volume 56, with no cost increases, as well as page allocations by regions, were reviewed and accepted.

The declining numbers of papers submitted for publishing was discussed at length, with Directors encouraged to discuss this matter within their regions to identify possible causes and ways in which more papers might be included.

The Southern African Potential Region was approved for full regional status, effective January 1, 2007.

The effort to promote IPPS within Continental Europe was reviewed and recognized as ineffective, probably because of cultural differences and the nature of the nursery industry in those countries.

A potential category of membership for “at-large” members — individuals from countries around the world not associated with a particular region, was discussed. A committee will further discuss this possibility and bring recommendations to the Board.

Jörgen Selchau of the Scandinavian Region was selected as the Award of Honor recipient for 2006.

The Finance Committee provided a number of recommendations regarding financial reporting, investments, and bill-paying authority — all approved by the Board — and the committee was approved to be a Standing Committee of the Board for the future.
Work will proceed to produce a promotional CD for regional offices to use. The CD will include templates for a variety of promotional items that the region can personalize for its own use in promoting IPPS and regional events.

Regions were reminded that the IPPS International website is available for regions to host their regional websites without having to pay for their own websites on an independent server.

Funds were set aside for the preparation of all the Proceedings to be mounted on the ISHS website for horticultural publications, for member searching and paper downloading. This is a major undertaking for the Board, placing the IPPS Proceedings in the national limelight as a unique reference resource for ornamental propagation and production information.

Negotiations will commence on the opportunity for IPPS to have a refereed journal, possibly by assuming responsibility for a journal already being published. The Board will review more information in March of 2007.

The request for annual funding of $2,500 for the “Propagation of Ornamental Plants” journal was not approved.

Southern African Region will host the 2014 International Tour. Scandinavian Region will no longer host tours since that region will merge with the Great Britain & Ireland Region as an area of that region.

The voting on the constitutional amendment adding a Second Vice President to the Board was reported — the amendment and two others were passed by the collective majority of votes in all regions.

The budget proposed for 2007 was approved, with an expected excess of revenue over expenses.

Regions were encouraged to include a page in their regional newsletters for International business, including a message from the International President and other news of international interest.

A strategic planning session will be scheduled as part of the 2007 International Tour.

Alternate Directors will be invited to be more active participants in committee work during the International Tour.

For the 2007 International Tour, Regional Secretary-Treasurers will be encouraged to attend to participate in the planning session and interact with the Directors and Alternate Directors. The International Board will assume responsibility for airfare costs, with regions asked to pay the tour registration costs.

Election of 2007 officers resulted in the following:

- President – James Gilbert, Southern Region of North America
- Vice President – Terry Hatch, New Zealand Region
- Second Vice President – Peter Bingham, Region of Great Britain & Ireland
- International Secretary-Treasurer – Patricia Heuser
- International Editor – Dr. Charles Heuser
2006 INTERNATIONAL TOUR

The International Board is grateful to the IPPS members in the Scandinavian Region for an exciting, informative, and enjoyable time visiting Sweden, Norway, and Denmark during the 2006 Viking Tour. These are beautiful countries — rugged and lush landscapes, picturesque cities and towns, hard-working people with a history of self-sufficiency, vision, and pride in their families and communities. For those of us from the United States, history takes on a new meaning, with buildings older than our country — still occupied! The feeling one has in Scandinavian countries is simplicity — and ingenuity in design of all things that support human existence. People prosper in integration with nature and the natural environment — buildings and towns blend into the natural environment instead of being in harsh contrast with this old and majestic part of our world.

Thanks to Jörgen Selchau, International President, for enlisting the wonderful help of a number of Regional leaders to plan the tour and assist the group in its travels. Marianne Andersen, Regional President, and Lars Sangaard, Regional Treasurer, were part of the tour group and their knowledge of the areas we traveled through was extremely helpful. Lars Rudin guided us in Sweden from Malmö to Gothenburg, including visits to Splendor Plants in Svanshall and TÖnnersjö Plantskola in Halmstad, the largest tree producer in Sweden. Our route also allowed us to spend time at the Gothenburg Botanical Gardens, one of the leading botanical gardens in Europe, located in the center of the city so all can enjoy its beauty and environmental importance.

In Norway, our guide met us in the wonderful waterfront village of Dröbak — Inger Hilmersen grew up near this quaint fishing village and led a beautiful evening walking tour of the town and the coastal path, her memories of the town’s history adding even more to our visual appreciation. In the Reenskaug Hotel that night, the group paid tribute to the retirement of John Wott as International Secretary-Treasurer, with many of the “old-timers” in the tour group reliving some of the happy times spent with John in his past twenty years of participation on the tours and handling the Society’s affairs in the International Office. An appreciation plaque was presented to John, along with many good wishes for a healthy and happy retirement.

Grimsby, an innovative family greenhouse strawberry operation in Hobål, was our morning stop, and we then enjoyed an adventurous trip to the Holmenkollen Park Hotel, high atop the hills overlooking Oslo — site of the winter sports area and magnificent ski jump. Our bus, a two-level beauty, was too tall to maneuver a low bridge on the road to the peak, but our driver, Pia, managed to turn around and the group was treated instead to a ride on the local train to the top of the mountain. Lunch in the Hotel was elegant and delicious, and we could clearly see why this resort was such a popular spot for wedding receptions, parties, winter sports, and summer enjoyment of the surrounding forested area. Then we were off to the harbor in Oslo for an overnight cruise to Denmark.

Arne Andersen was with the tour group from the beginning, but he took over as our Danish guide when we arrived in Copenhagen. The culture of this city is amazing, and we spent a wonderful morning seeing some of the city, with a stop at the Royal Castle and it’s beautiful fountain gardens. We also spent time at the Louisiana Art Museum, whose grounds alone were worth the visit. A visit to the Danish Wine Center helped us appreciate the entrepreneurial spirit of these people —
growing grapes and making wine in a country whose appreciation for fine wine is just emerging. Thanks to a sponsorship from Jörgen Selchau’s company, GPL International, the group took time to enjoy Tivoli Gardens in central Copenhagen, including dinner at one of the amusement park’s fine and fun restaurants.

The next morning's stop at PlanteRiget helped us appreciate the garden center industry in Denmark — the marketing savvy of the family owners brought a mixture of plant materials and gift items to their customers — again reminding us that it is the enjoyment of plants in a living environment that we are truly “selling.” The greenhouse production of lettuce and herb varieties for the consumer marketplace at the nursery, Legro, was an amazing display of greenhouse automation. In the afternoon, we visited with Christensens Planteskole I/S in Fjenneslev where a family business only five years old was still struggling with the challenges of growth with a positive outlook and creative ideas. The crossover from Copenhagen to Odense on the Great Belt Bridge, the second-largest suspension bridge in the world was “awe-some” and again reminded us of the engineering expertise that seems so prevalent in these countries.

In the Stige area, the group was again intrigued by the automation and technology used in production at Ex-Plant ApS in Stige and also at Dalina ApS and its collaborative operation, Gartneriet Näldebakken ApS. Robotics and mechanization are replacing the need for large labor forces, an important aspect of profitability in a country with high labor costs and almost negligible unemployment. Ivy production at Multigreen.dk in Fangel also showed how robotics can add significant value to production, with almost “around the clock” automation enhancing human labor where skilled hands and knowledgeable minds can’t be replaced.

With the tour’s end in Odense, the group was treated to a wonderful dinner and evening’s enjoyment at an historic location called Holckenhavn Castle — the newest owner is investing millions of kroners in restoring the castle to its original charm and functionality. We were delighted to be able to appreciate once again the history and continuing cultural contributions of these families in Denmark.

For the next two days, many of the group participated in the Scandinavian Region’s conference and enjoyed some time in Odense, birthplace of Hans Christian Andersen, the marvelous writer of fairy tales we all enjoyed as children.

There are no words to fully express the sense of shared excitement, amazement, and companionship these tours provide to the people who come from all over the world with a passion for plants and for IPPS. The group is “seeking and sharing” not only the plant knowledge that still excites them, but also the human bond that keeps the world a smaller place where we can understand and appreciate our varying backgrounds and cultures and comfortably enjoy all that each of us gives to each other.

RECIPIENTS OF BOTH THE EASTERN REGION’S AWARD OF MERIT AND FELLOW

This Award of Merit is made to the individual(s) who, in the opinion of the Award of Merit Committee, has made a significant contribution to the field of plant propagation. The criteria for selection include scientific discovery and application of facts related to propagation practices and techniques, and/or for service rendered to the science and practice of plant propagation.

L.C. Chadwick*, Columbus, Ohio, 1957
F.L. Skinner*, Morden, Manitoba, 1958
J.S. Wells*, Red Bank, New Jersey, 1959
H.M. Templeton, Jr.*, Winchester, Tennessee, 1960
Carl Kern, Cincinnati, Ohio, 1962
Charles E. Hess, Lafayette, Indiana, 1963
W.E. Snyder*, New Brunswick, New Jersey, 1964

Martin Van Hof*, Newport, Rhode Island, 1966
Leslie Hancock*, Cooksville, Ontario, 1968
F.L.S. O’Rourke, Fort Collins, Colorado, 1969
Case Hoogendoorn*, Newport, Rhode Island, 1970
Alfred Fordham*, Jamaica Plain, Massachusetts, 1971
Richard H. Fillmore*, Durham, North Carolina, 1972
Harvey Gray*, Melville, New York, 1974
Hugh Steavenson*, Elsberry, Missouri, 1975
Thomas Pinney, Jr., Sturgeon Bay, Wisconsin, 1976
John Roller*, Marshall, Texas, 1977
Ray Halward*, Hamilton, Ontario, 1978
Carl Orndorff*, Clarksville, Maryland, 1980
Ralph Shugert*, Grand Haven, Michigan, 1981
J. Peter Vermuelen, Neshanic Station, New Jersey, 1981
John McGuire, Kingston, Rhode Island, 1982
Larry Carville, Vernon, Connecticut, 1982
Richard H. Zimmerman, Beltsville, Maryland, 1984
Joerg Leiss, Oakville, Ontario, 1985

RECIPIENTS OF SOUTHERN REGION’S SIDNEY B. MEADOWS AWARD OF MERIT

Charles H. Parkerson, Suffolk, Virginia
David Byers, Huntsville, Alabama
Dr. Vivian Munday, Watkinsville, Georgia
Dr. Bryson James, McMinnville, Tennessee
Dr. Fred T. Davies, Jr., College Station, Texas, 1994
Bill Barr, Houston, Texas, 1995
James Berry, Loxley, Alabama, 1996
Dr. J.C. Raulson, Raleigh, North Carolina, 1997
Richard Marshall, Salisbury, Maryland, 1998

John Machen, Sr., Mobjack, Virginia, 1999
Dr. Carl E. Whitcomb, Stillwater, Oklahoma, 2000
Dr. Michael A. Dirr, Athens, Georgia, 2001
James Gilbert, Tryon, North Carolina, 2002
Dr. David Morgan, Bedford, Texas, 2003
Fred Garrett, Southern Pines, North Carolina, 2004
Dr. Charles Gilliam, Gainesville, Florida, 2005
Dr. Donna Fare, McMinnville, Tennessee, 2006

FELLOW RECIPIENTS

John Machen, Sr., 1993
Charles Parkerson, 1993
Dr. Carl Whitcomb, 1993
Ron Copeland, 1994
Fred W. Garrett, 1994
Peter van der Giessen, 1995
Judd Germany, 1995
David Byers, 1996
Dr. Michael A. Dirr, 1997
Dr. Bryson L. James, 1998
James Berry, 1999
Buddy Martin, 1999

Richard Marshall, 2000
Ben Davis II, 2000
Wayne Sawyer, 2001
James Gilbert, 2002
Dr. David Morgan, 2003
Bill Barr, 2004
Doug Torn, 2004
Don A. Covan, 2005
Randy Jacobs, 2005
Margie Y. Jenkins, 2005
Dr. Charles Gilliam, 2006
Dr. Fred T. Davies, 2006

WESTERN REGION

OFFICERS
President — DOUGLAS E. C. JUSTICE, UBC Botanical Garden, 6804 SW Marine Drive, Vancouver, BC V6T 1Z4, Canada
First Vice President — MICHAEL ANDERSON, Carlton Plants, 14301 S.E. Wallace Road, Dayton OR 97114-0399
Second Vice President — MICHAEL NEVIN SMITH, Suncrest Nurseries, Inc., 400 Casserly Road, Watsonville, California 95076
Secretary-Treasurer — LELIA (LEE) U. DEMPSEY, 11168 Orion Way, Grass Valley, California 95949-9758
Editor — DR. DAVID W. BURGER, Department of Environmental Horticulture, University of California, Davis, California 95616
EXECUTIVE COMMITTEE

Douglas E. C. Justice, President
Michael Anderson, First Vice-President
Michael Nevin Smith, Second Vice President
David Hannings, Past President
James F. McConnell, Director on International Board
David Hannings, Alternate Director on International Board

LIST OF PAPERS PRESENTED ANNUAL MEETINGS

EIGHTH ANNUAL MEETING — SOUTHERN AFRICAN POTENTIAL REGION

Interpreting Water Analysis
  Chris de Jager ................................................................. 43

Water Analysis Equipment
  Jackeline Dinwoodie ......................................................... 44

Efficient Plant Production and Cultivation
  Ben Geijtenbeek ............................................................... 47

Optimizing Fertilization for Plant Cultivation
  Ben Geijtenbeek ............................................................... 50

Jumping the Garden Fence
  Hildegard Klein ................................................................. 52

Implications of the Biodiversity Act on the Nursery Industry
  Kay Montgomery ............................................................... 56

Cultivation of Southern African Succulents
  Ian Oliver .............................................................................. 59

Mutation Breeding in the Hyacinthaceae
  Sanette Thiart .................................................................. 62

Wheelie Green: The Development of a Mobile Unit to Produce Rooted Cuttings of Eucalyptus Tree Species
  Helena M. Venter .............................................................. 65

THIRTY-FOURTH ANNUAL MEETING — AUSTRALIAN REGION

The Use of Copper Compounds as Root Pruning Agents
  Ann Radke .......................................................................... 73

Root Systems in Cutting-Raised Eucalyptus Species Are Influenced by Cutting Size and Stock Plant Treatment
  David O. Cliffe .................................................................. 78

Air Pruning Techniques
  Ian Gordon ........................................................................... 80

Irrigation Management
  John Bunker ......................................................................... 84

Propagation of Chamelaucium uncinatum Cultivars by Grafting
  Bradley J. Pearce .............................................................. 88

Environmental Factors Affecting Plant Tissue Cultures
  Richard R. Williams .......................................................... 91

In-Slab Bench Heating Improves Propagation Hygiene and Cuts Maintenance Costs
  Paul Carmen ........................................................................ 96

Tapping Our Biodiversity: The Future of Native Plants in Horticulture in Queensland
  Peter Radke ......................................................................... 100

The Effects of Mulch on Soil Temperatures for Field Growing Conditions
  Ian S. Tolley ......................................................................... 104
THIRTY-FIFTH ANNUAL MEETING — NEW ZEALAND REGION

The Shady Side of Fern Propagation
Paul Michael ......................................................................................................... 109

The New Zealand Native Plant Collection at Dunedin
Botanic Garden: “Our Treasure”
Shirley Stuart ....................................................................................................... 111

A Few Observations on Misconceptions: Rot ’n Rush
Terry Hatch ........................................................................................................... 114

Whistle Stop Chelsea 2005 Experience
Carole Scholes ....................................................................................................... 117

Question Box .......................................................................................................... 119

THIRTEENTH ANNUAL MEETING — IPPS JAPAN REGION

Overview of Annual Meeting of IPPS Japan Region 2006
Kaneto Aoyama .................................................................................................... 123

Field Trip in Wakayama Prefecture, Japan
Nobumasa Nito..................................................................................................... 127

Plant Type Variation Induced by Grafting and the Related Genes Analysis in Pepper
Takumi Katano, Hiroaki Miyazawa, Katsuaki Suzuki, and Yutaka Hirata ............................................................................................... 132

A Novel Technique for Mass Propagation and Production of Miniature Pot Plants of Mountain Laurel (Kalmia latifolia)
Tomio Nishimura, Hiroshi Tagata, and Tadao Fujimori ........................................... 140

Tetraploid Induction by Colchicine in Rosa bracteata
Hirokazu Fukui and Akiko Takahashi .............................................................. 141

Studies on Dwarfing Rootstocks of Japanese Persimmon
Takuya Tetsumura .................................................................................................. 142

Potential of Neem Extracts for Insecticide
Masanori Tomita and Hiroshi Endo...................................................................... 146

Summary of Development, Introduction, and Marketing Strategy to Share Lotus in the Southeast United States
Daike Tian, Ken M. Tilt, Floyd M. Woods, Jeff L. Sibley, and Fenny Dane ....................... 151

I.P.P.S. New Zealand and Qualification of I.P.P.S. Japan
Yutaka Hirata and Katsuaki Suzuki ........................................................................ 155

Hormonal Morphogenesis of Mulberry Tree Mutant
Tatang Sopian and Yutaka Hirata ........................................................................ 156

THIRTY-NINTH ANNUAL MEETING — REGION OF GREAT BRITAIN AND IRELAND

Development of a Pest Warning System to Reduce Chemical Use in Hardy Nursery Stock Production and by Professional Gardeners
Jan Gouwy ............................................................................................................ 165

Breeding Strategies for Woody Ornamentals: Selection Towards Disease Resistance with Particular Reference to Powdery Mildew
Johan Van Huylpenbroek, Katrijn Van Laere, and Leen Leus................................. 168
Propagating Dahlias for Royal Horticultural Society Trials
David Hide ............................................................................................................ 174

Alpine Habitats and Cultivation in North-West Yunnan
Jane Armstrong .................................................................................................... 177

Suitability of Processed Whole Pine Tree as a Substrate Component for Production of Greenhouse Crops
Glenn B. Fain, Charles H. Gilliam, Jeff L. Sibley,
and Cheryl R. Boyer ............................................................................................. 180

Application of Lean Manufacturing to Nursery Stock Production at Johnsons of Whixley
Jonathan H.T. Whittemore ................................................................................. 188

Ditch Systems for Biological Filtration of Recycled Irrigation Water
Rene Jochems ....................................................................................................... 192

The Application of Advanced Irrigation Technology in Hardy Ornamental Nursery Bed Systems
Russel Sharp ......................................................................................................... 194

Experience Using Controlling Seed Moisture Content During Stratification to Improve Germination on the Nursery
Niels Dictus ........................................................................................................... 198

Liquid Sorting and Film Coating: Techniques for Improving Tree Seed Performance
M.P.M. Derkx ....................................................................................................... 200

Biofumigants and Green Manures for Field-Grown Nursery Stock
Abi Rayment ......................................................................................................... 205

Bionomics for Woody and Herbaceous Perennial Plant Production
Karel Eigenram .................................................................................................... 208

Compost and Compost Tea in Organic Greenhouse Horticulture Using the Soil Foodweb Approach
Didier Bouden ....................................................................................................... 213

Practical Experience with Active Compost and Compost Tea in Container Production
Carlos Verhelst .................................................................................................... 218

Suggestions for Using Compost Tea in Cuttings Propagation
John Summers ....................................................................................................... 221

Comparison of Ground-Cover Materials for Container Growing Systems: Horizontal Versus Vertical Drain
Els Pauwels ........................................................................................................... 222

FIFTEENTH ANNUAL MEETING—IPPS SCANDINAVIAN REGION

The Influence of a Dynamic Climate on Pests
Lene Jakobsen, Jesper M. Aaslyng, Annie Enkegaard .................................... 229

Viruses in Plants — Fascinating but Treacherous
I. Elisabeth Johansen .......................................................................................... 233

Hygiene Problems in Plant Tissue Culture Propagation
Sridevy Sriskandarajah ....................................................................................... 238

Regeneration of Farfugium japonicum Through Adventitious Shoot Formation from Leaf and Petiole Explants
Tomohide Yamamoto ........................................................................................... 242
FIFTY-SIXTH ANNUAL MEETING — EASTERN REGION, NORTH AMERICA

Welcome
Steve Castorani ................................................................. 249

Some Thoughts from Inside and Outside the Propagation House
Todd Davis .................................................................................. 251

Basic Facts about United States Plant Patents, Trademarks, and Brands
Tom Foley, Jr. .................................................................................. 254

Why We Brand
Mark Sellew .................................................................................. 257

Some Computers and Half-a-Dozen Graphic Artists. Not! Marketing Opportunities with Patents, Trademarks, and Brands
Jonathon Pedersen ....................................................................... 259

On the Way to the Market: A Retailer’s Perspective on Plant Branding
Karen M. Olson ............................................................................. 264

Alternative Strategies for Clonal Plant Reproduction
Robert L. Geneve .......................................................................... 269

Propagation Equipment 101
Alan Jones .................................................................................... 274

It Ain’t Just Dirt
R. Christian Cash ........................................................................ 280

Wow! The Hormones Have Kicked In
Bradley Rowe ............................................................................... 284

Will Some Plants Get “Green Cards”?
Wayne Mezitt ............................................................................... 287

Will Some Plants Get “Green Cards”?: Current Thoughts on Invasive Species
Robert E. Schutzki .................................................................... 289

Plants for a Livable Delaware
Faith B. Kuehn ............................................................................ 293

Hey Joe, Can You Believe They Outsourced My Job Too?
Peggy Walsh Craig ....................................................................... 297

The Use of Offshore-Produced Unrooted Cuttings at North Creek Nurseries
Steve Castorani ........................................................................... 298

Outside The Box: Breeding of Not-So-Common Woody Landscape Plants at the United States National Arboretum
Margaret Pooler and Richard Olsen ........................................... 300

Heuchera and Its Allies
Dan Heims .................................................................................. 303

Using Traditional and Biotechnological Breeding for New Plant Development
Mark Bridgen ................................................................................ 307

The New Faces of Hellebores
David L. Culp ................................................................................ 311

Large Scale Propagation and Production of Native Woodland Perennials
William Cullina ............................................................................ 313
Grafting: A Review of Basics as Well as Special Problems Associated With Conifer Grafting
Richard A. Larson ................................................................................................ 318

Efficiency Tools for Field Growers
Astrid Newenhouse, Marcia Miquelon, and Larry Chapman ......................... 323

DNA Multiscan®: A New Tool for Rapid Detection of Pathogens in Water, Soil, and Plant Tissue
Marc Sabourin ...................................................................................................... 327

Growing Insect-Free Plants with New Technology
Stanton Gill, Chuck Schuster, Ginny Rosenkranz, Paula Shrewsbury,
and Suzanne Klick ............................................................................................... 330

Just When I Thought I Had the Right Recipe
Keith Osborne ....................................................................................................... 340

Selectrocide™ Chlorine Dioxide as a New Product for the Control of Algae and Other Microbial Pests in Greenhouse Irrigation Systems
Peter Konjoian ...................................................................................................... 342

Recent Advances in Cutting Propagation
Brian Maynard ..................................................................................................... 354

Flowering Shrubs: Shaking Up the Market
Tim Wood .............................................................................................................. 357

The Early History of the International Plant Propagators’ Society
Philip A. Barker .................................................................................................... 365

Breeding, Propagation, and Production of Clematis
Chris Ozanne ........................................................................................................ 373

While They Were Asleep: Do Seeds After-Ripen in Cold Storage?
Experiences With Calendula
Mark P. Widrlechner ........................................................................................... 377

Polyploidy: From Evolution to New Plant Development
Thomas G. Ranney ................................................................................................ 383

New and Underused Woody Plants: A Personal Perspective
John E. Elsley ....................................................................................................... 390

New Plant Forum
Jack Alexander, H. William Barnes, Mark Bridgen, Steve Castorani, Tim Wood, and Michael Yanny ........................................................ .................. 398

POSTERS
The University of Rhode Island Ornamental Breeding Program
Jeffrey A. Adkins, Nicholas Castrataro, and Erik Fargo ................................. 402

Understanding Remontant Flowering in Hydrangea macrophylla
Jeffrey A. Adkins ............................................................................................... 404

Rooting Possibilities of Fraxinus chinensis
H. William Barnes ............................................................................................... 406

Grafting White Barked Birches onto Betula nigra: Practice and Possibilities
H. William Barnes ............................................................................................... 407

Propagation of Jamesia americana
H. William Barnes ............................................................................................... 411
Propagation and Use of Adina rubella
H. William Barnes................................................................................................ 413

Production of Fortunearia sinensis from Seed
H. William Barnes................................................................................................ 414

Production of Sinojackia rehderiana and Sinojackia xylocarpa from Seed
H. William Barnes................................................................................................ 416

Scion and Rootstock Effects on Growth and Early Acorn Production of Grafted Swamp White Oaks
Mark V. Coggeshall, J.W. Van Sambeek, and H.E. (Gene) Garrett .................. 418

Shrub Liner Growth and Development Control with Plant Growth Regulators and Water Stress
Benoit Guerry and David Joeright..................................................................... 423

Micropropagation of Physocarpus amurensis
Hailong Shen, Dongsheng Yin, Peng Zhang, Ling Yang, Jiang Huang, and Yu Zhang............................................................................................. 425

Growing Shrub Liners on Flood Floors
David Joeright...................................................................................................... 430

Finishing a Liner Faster Using Multiple Stem Cuttings
Angela Korty and Briggs Lipsitz ........................................................................ 432

August Field Planting of June Stuck Softwood Cuttings
Jon Pickerill and Kyle Banas................................................................................ 433

Efficacy of Wastewater Irrigation for Rooting of Ornamental Cuttings
Eric Roesler and Calvin Chong........................................................................... 434

Hydrangea macrophylla and Hydrangea serrata Trials at the University of Kentucky
Robert E. McNiel, Sharon Bale, Terry Jones, and Bonka Vaneva ..................... 439

Seed Propagation of Rare and Unusual Acer Species: A Review of Propagation at the Morris Arboretum
Susan Stansbery, Anthony S. Aiello, and Shelley Dillard ............................... 442

Somatic Embryogenesis in White Oak (Quercus alba)
S. Tittle, S.T. Kester, and R.L. Geneve............................................................... 450

Adventitious Root Formation in Tomato Hormone Mutants

Propagation of Spicebush (Lindera benzoin)
A.L. Poston and R.L. Geneve............................................................................... 458

The Western Red Lily Centennial Project
Lisa May................................................................................................................. 461

FORTY-SEVENTH ANNUAL MEETING — WESTERN REGION
Horticulture UK, Adapting to a Changing and Challenging Marketplace
David Aylieff-Sansom.......................................................................................... 467

Conifer Cone and Seed Processing
Dave Kolotelo....................................................................................................... 474

Small Lot Seed Handling of Species Native to British Columbia
Paulus Vrijmoed.................................................................................................... 479

Session I: Questions and Answers...................................................................... 487
Direct Sticking Through Plastic
    Bruce Peel ................................................................. 488

Propagating Ornamental Grasses at Small Nurseries
    Ewan MacKenzie .......................................................... 494

Mycorrhizal Fungi: Impact of Commercial Products in Nursery Propagation
    Mario Lanthier ............................................................. 496

Session III: Questions and Answers ........................................ 509

Propagation of Difficult-to-Root Shade Trees: *Parrotia* and *Carpinus*
    Sandy Howkins ............................................................ 511

Greenhouse Automation and Plant Propagation’s Global Connection
    Sheila Bhattacharya ........................................................ 514

Session V: Questions and Answers ........................................ 516

*Daphne* Research at the University of British Columbia:
The Search for Fungal Resistance
    Andrew Riseman ........................................................... 517

Propagating *Rhododendron* Species by Cutting and Seed
    Dennis Bottemiller ....................................................... 520

Simple Successful Propagation at Classical Farms
    Ross Merker ................................................................. 523

Session VI: Questions and Answers ........................................ 526

Chemical and Physical Properties of Douglas Fir Bark Relevant to the Production of Container Plants
    M.G. Buamscha, D.M. Sullivan, J.E. Altland, and D.A. Horneck ............ 527

Seed Germination and Viability of *Bursera* Species of Morelos, Mexico
    Evelyn A. Healy, Richard Y. Evans, and Consuelo Bonfil .................... 528

THIRTY-FIRST ANNUAL MEETING — SOUTHERN REGION OF NORTH AMERICA

Technical Sessions
    Bob Smart, David Threatt, Kay Phelps ..................................... 533

The Principles and Practices of Breeding Hydrangeas
    Josh Kardos ...................................................................... 534

The IR-4 Ornamental Horticulture Program: What, How, and Why
    Cristi L. Palmer .................................................................. 538

Propagation of Deciduous Azaleas
    Donald W. Hyatt ............................................................ 542

Propagation at the U.S. National Arboretum, an Overview
    Barbara L. Bullock ........................................................ 548

A New Substrate for Container-Grown Plants: Clean Chip Residual
    Cheryl R. Boyer, Charles H. Gilliam, Jeff L. Sibley, Glenn B. Fain,
    Thomas V. Gallagher, and H. Allen Torbert ................................. 553

Pre-Emergent Herbicide Use in Propagation of *Loropetalum chinense* ‘Ruby’
    Diana R. Cochran, Charles H. Gilliam, D.J. Eakes, Glenn R. Wehtje,
    and Patricia R. Knight .................................................... 560

Native Plants and Communities of the Piedmont of North Carolina
    Dennis P. Niemeyer ........................................................ 566

Aromi Retrospective
    Maarten van der Giessen .................................................. 569
